Allowable Subject Matter

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the invention of a hydraulic control valve arrangement for an automatic transmission wherein a pressure source provides an original pressure to a first port of a pressure adjusting unit and to a changeover valve, the changeover valve being connected to the source via a connecting oil passage, the adjusting unit having an output port for supplying an adjusted pressure to a hydraulic servo of a friction engagement device within the transmission, the adjusting unit also having a second port connectable to a drain or to an original pressure output port of the changeover valve, the original pressure output port being connectable to either a drain or to the connecting oil passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the reference cited in Applicant's Information Disclosure Statement filed July 28, 2003. The Japanese patent doesn't show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. The all show various ways of dealing with a failed condition within the transmission, but none of them show the specific hydraulic circuit claimed.
